Category 15g	Not captured by any other sub-category	KEYWORD_OTHER	These are violations of Discord's Terms of Service including spam, platform abuse, impersonation, and other policy violations not covered by adult content, age restrictions, geographic requirements, prohibited goods and services, language requirements, or nudity policies.
Category 16	Type of illegal content not specified by the public authority	STATEMENT_CATEGORY_NOT_SPECIFIED_ORDER	These are violations of Discord's Terms of Service where insufficient information was provided to determine the specific category of illegal content.
Category 17	Type of alleged illegal content not specified by the notifier	STATEMENT_CATEGORY_NOT_SPECIFIED_NOTICE	

Applicability	Service	Reporting period	Category of illegal content	Description of the sub-category "Other"	Scope	Number of orders to act against illegal content received	Number of specific items of information included in the total number of orders to act against illegal content	Median time to inform the authority of the receipt of the order to act against illegal content	Median time to give effect to the order to act against illegal content	Number of orders to provide information	Median time to inform the authority of the order to provide information	Median time to give effect to the order to provide information	Contextual information on number of orders to act against illegal content received	Contextual information on number of specific items of information included in the total number of orders to act against illegal content	Contextual information on Median time to inform the authority of the receipt of the order to act against illegal content	Contextual information on Median time to give effect to the order to act against illegal content	Contextual information on Median time to give effect to the order to act against illegal content	Contextual information on Number of orders to provide information	Contextual information on Median time to inform the authority of the receipt of the order to provide information	Contextual information on Median time to give effect to the order to provide information
All	Discord	2025-01-01/2025-12-31	TOTAL		TOTAL	60	165	27.46 h	27.55 h	12 h	4.4 h	4.4 h		Notices oftentimes include multiple information links (e.g. 10 unique message links, all belonging to 1 Discord user/server). This explains the difference logic between total number of orders to act against illegal content received and number of specific items of information included in the total number of orders to act against illegal content.	While maintaining the 24-48 hour benchmark, we are currently broadening our support bandwidth. This includes an active upskilling program designed to diversify expertise across the team, ensuring high-resilience coverage and further stabilizing the turnaround metric	Discord measures the time to give effect to an order to act against illegal content from the time that it is received until the time that it is submitted by authority has either (a) provided a complete and valid order or request, or (b) withdraws the order or request. The longer median times reported are due to follow up or additional communication to obtain the information necessary to give effect to the order or request.		Turnaround times are tracking ahead of schedule. This is largely due to our streamlined workflows for data-related inquiries, which utilize direct reporting pathways to ensure rapid, high-velocity processing

Only for providers of hosting services, including online platforms	Discord	2025-01-01/2025-12-31	TOTAL		98589	34100	23 hours	193	637	30.66 hr		123		Notices oftentimes include multiple information links (e.g. 10 unique message links, all belonging to 1 Discord user/server). Enforcement is done on the entirety of the user/server. This explains the difference logic between total number of notices received and number of specific items of information included in the total number of notices.	Median action times remain consistently within the 48-72 hour window. Given the diverse taxonomy of harm types and multi-identifier data sets, we utilize a tiered review structure involving specialized internal teams.

All	Discord	2025-01-01/2025-12-31	Summary of the content moderation engaged in at the providers' own initiative	Discord publishes and maintains a comprehensive set of Community Guidelines that explain what content and behavior is and is not allowed on the platform. The Guidelines apply to all parts of the service, including content, behavior, servers, and apps. Our Policy Hub expands on these Guidelines, providing more information about our policies. Discord is where people hang out before, during, and after playing games. For Discord's DSA Transparency Report, we have combined our reported metrics across Discord. But Discord provides multiple ways for users to communicate, some of which constitute an Online Platform under DSA, and others which are a Hosting Service. We work hard to create an online environment that users want to be a part of and spend their time enjoying. To do that, we follow a three-tiered approach: · User Controls: Discord's product architecture provides each user with control over who they communicate with, what they see, what communities they join. · Platform Moderation: Our community guidelines are enforced by Discord's Trust & Safety team through a mix of proactive and reactive measures, supported by tooling and ML. For further discussion of those tools and methods, see Discord's response to Question 3E below. · Community Moderation: Server owners and community moderators, aided by moderation bots, define and enforce Community norms and behavior that go beyond the Discord Community Guidelines. This is also seen in our publicly available article about our Approach to Content Moderation. All users have the ability to report behavior to Discord. User reports are processed by our Trust & Safety team for violative behavior so we can take enforcement actions where appropriate. When we see content that violates our policies, we take the appropriate action based on the severity of the violation. The result of our actions are conveyed to users through our Warning System and include: · Warning to the user that future violations may result in more severe consequences; · Restricting user access to features (e.g., inability to send images on Discord after sending an image that violated a Discord policy); · Content removal; · Temporary suspension of user account; · Permanent ban of user account. When a server is focused on or contains a lot of content that violates our policies, the owner of the server will receive a violation and the server may be removed or restricted. Just like user violations, the server owner will be provided a summary of the violation with more detail. Discord is also committed to working with industry partners and other organizations to support its safety efforts. Our Safety Reporting Network, features a global partnership of trusted organizations who collaborate directly with Discord's Safety team. Discord also contributes to and participates in industry-wide efforts such as the Lantern initiative, a first-of-its-kind signal sharing program for companies to enhance and strengthen how they detect attempts to sexually exploit and abuse children and teens online.
All	Discord	2025-01-01/2025-12-31	Meaningful and comprehensible information regarding content moderation engaged in at the providers' own initiative	Discord employs a variety of proactive and reactive measures to moderate content and promote a safe environment. Discord's Trust & Safety team is trained to evaluate and act upon flagged and reported content to enforce our guidelines. Automated systems analyze user-generated content in certain circumstances and monitor for trends in user activity, either making initial assessments for violations of Discord's Community Guidelines, or flagging potential violations and unusual activity for further review by human moderators. Human moderators may perform secondary reviews to validate flagged content and address nuanced or context-specific cases. Discord also works hard to proactively identify harmful content and conduct so we can remove it and therefore expose fewer users to it. We work to prioritize the highest harm issues such as child safety or violent extremism. We use a variety of techniques and technology to proactively identify harmful behavior, including: · Image hashing and machine-learning powered technologies that help us identify known and unknown child sexual abuse material. We report child sexual abuse and other related content and perpetrators to the National Center for Missing & Exploited Children (NCMEC), which works with law enforcement to take appropriate action. · Machine learning models that use metadata and network patterns to identify bad actors or spaces with harmful content and activity. · Human-led investigations based on flags from our detection tools or reports. We may use automated means to proactively identify harmful content on the platform and enforce our Terms of Service and Community Guidelines. As we continue to evolve our proactive efforts, our focus is on developing technologies to aid in the detection and removal of this harmful content as quickly as possible while respecting our users' privacy. For example, we have a dedicated team that has created and is now utilizing a new machine learning model that can detect previously unknown CSAM, and we have made this technology more widely available via open sourcing. We will continue to innovate and collaborate with industry partners to address emerging challenges, and we collaborate closely with organizations like the National Center for Missing & Exploited Children (NCMEC) and Internet Watch Foundation. Measures of Exposure Discord users often rely on the platform to talk and hang out with their friends while playing games. Users look to Discord's subscription offering, Nitro, to enhance their experience with features like improved streaming quality or more ways to express themselves while messaging with friends. This communication often happens in real time such that Discord does not track the number of times a user may "view" a piece of content. Discord has developed methods to assess the effectiveness of its content moderation practices across its policies. These measures are robust, and assess the factors such as the responsiveness to user reports and the prevalence of harmful content on the platform. Discord has evolved its content moderation systems and practices as a result of DSA implementation.
All	Discord	2025-01-01/2025-12-31	Qualitative description of the automated means	Discord's automated systems as described in 3E above.
All	Discord	2025-01-01/2025-12-31	Qualitative description of indicators of accuracy and possible rate of error of automated means	Discord tracks the efficacy of its automated review tools, including the recall and precision of models, the outcomes, the number of false positives, the overall number of images detected by hash matching or novel-image models, and the proactivity rate. Discord uses this information to inform future improvements to its detection models and safety tools, review the efficacy of its interventions and existing tools, and gain insight into their current state of operation.
All	Discord	2025-01-01/2025-12-31	Specification of the precise purposes to apply automated means	Please refer to Discord's response to Question 3E above.
All	Discord	2025-01-01/2025-12-31	Safeguards applied to the use of automated means	Please refer to Discord's response to Question 3E for a summary of how Discord ensures the efficacy of its models and automated measures. Discord's automated tools are designed to support the proactive and reactive identification of violations of Discord's policies. Depending on the type of content or method of detection, the decisions by Discord's automated tools that result in user action may receive human review. Discord continuously refines its models through regular updates to training data and comprehensive quality assurance reviews. This iterative process helps balance false positives (incorrectly flagged content) with false negatives (missed violations). By monitoring and adjusting these metrics, Discord works to maintain and improve accuracy in automated detection while minimizing incorrect content removals. Discord also updates its datasets on a cadence appropriate to their type and use case. In certain circumstances, Discord may conduct quality checks manually. Discord also performs A/B tests and ad-hoc retroactive studies to monitor decisions made based on its automated systems.
