

****Mission Brief: Operation Key Extraction****

****Scenario:****

A critical key card containing classified UEE data has fallen into enemy hands and is secured at their base. The mission is clear: retrieve the key card at all costs and transport it to the designated drop-off point. Time is of the essence, and resources are limited.

Mission Objectives:

****Attackers (Infiltration Unit)****

****Primary Objective:**** Infiltrate the enemy base, locate the Zeus carrying the key card, and safely extract it to the drop-off point outside the base perimeter.

****Secondary Objective:**** Conserve resources and avoid unnecessary engagements to maintain the element of surprise.

****Defenders (Base Security)****

****Primary Objective:**** Prevent the attackers from breaching the base perimeter and securing the key card. Protect the Zeus at all costs.

****Secondary Objective:**** Conserve ammo while maintaining an effective defense against infiltration attempts.

Team Loadouts:

****Attackers:****

- ****Vehicles:**** Attackers can spawn any ground vehicle or FPS weapon at the three designated spawn locations.

- ****Aerial Support:**** Up to two drop ships are available but must remain outside the base's Anti-Air (AA) range.

- ****Ammo:**** FPS ammunition is limited. Be selective with your shots and prioritize high-impact engagements.

****Defenders:****

- ****Base Defense:**** Equipped with anti-air defenses capable of neutralizing inbound air threats.

- ****Weapons:**** FPS and ground vehicle weapons are permitted; no ship guns allowed.

- ****Ammo:**** Limited supply of FPS ammunition. Use it strategically to avoid running out before reinforcements arrive.

Rules of Engagement:

1. ****Ammo Conservation:**** Ammunition is finite on both sides. All team members should use ammo sparingly and ensure every shot counts.
2. ****Ground Only:**** Ship weaponry is not authorized. All combat is to be conducted using FPS weapons and ground vehicles only.
3. ****Tactical Engagements:**** Attackers are encouraged to move stealthily and avoid prolonged firefights. Defenders should aim to control key access points without depleting ammunition.

Tactical Notes:

- ****Attackers:**** Coordinate each wave carefully and prioritize stealth to avoid extensive combat. Make sure all personnel have an exit plan and remain aware of ammo levels.
- ****Defenders:**** Focus on maintaining the security of the Zeus and the base perimeter. Set ambushes and checkpoints, but avoid wasting ammo on suppressive fire.

Mission Success:

- ****Attackers:**** Secure the key card and deliver it to the drop-off point with minimal loss of life.
- ****Defenders:**** Successfully protect the key card and retain control of the Zeus until attackers are neutralized.

> ****Remember, precision over power. Your objective is critical, and resources are limited—handle them wisely. Good luck!****
